The National Photonics Initiative (NPI) realized several advocacy achievements in 2015 in support of advancing the photonics sector as a critical component of the American science and technology innovation ecosystem. As we look ahead, there are several opportunities to get involved in the NPI’s efforts during the first half of this year. Please read on to see if the mission is one you would like to support.

An Update on AIM Photonics
November 17, 2015

NPI wraps up 2015 with White House meeting, Capitol Hill visits
